

SERVING THE METAL WORKING INDUSTRY OVER 25 YEARS

MB 100-C

COOLANT

SOLUBLE OIL CONCENTRATE

MB 100-C is a multi-purpose emulsifying oil based product for use in all metal working processes. It is a water soluble "LUBRI_COOLANT" for use in machining all types of metals including steel, cast iron, aluminum and stainless. MB 100-C's excellent anti-rust and germicide agents give it extended shelf life and virtually no spoilage in expensive machines. The corrosion inhibiting agents also prevent rust from forming on the finished parts after the machine operations.

APPLICATIONS:

- Milling
- Drilling
- Turning
- Tapping
- Light Drawing
- Grinding
- Broaching
- Hobbing
- Sawing

MB 100-C Coolant is a high-tech lubricant with a wide range of use and versatility. Use of this product will eliminate the need for stocking numerous and varied products which basically do the same job!

MB 100-C FEATURES:

- Non Foaming
- Non Smoking
- Non Carcinogenic
- Increases tool life at very low concentrations
- Biodegradable and easily handled for removal and disposal
- Non toxic; no irritation to machine operator and no odor
- Non staining; either the work piece or expensive machines
- Long coolant life; premium high pressure lubricants prevent premature material breakdown
- Mixes well in hard water and forms a very stable non-separating coolant

MB 100-C PROPERTIES:

- Viscosity Sus/100F 296.7
- Pour Point -20°F
- Gravity API @ 60°F 12.6
- Sulfur % 0.982
- Chlorine % 0.40
- Pounds per gallon 4.06
- Flash Point 8.17
- Emulsion Appearance Off White
